

Get your agency on board with the pre-filled email address feature!

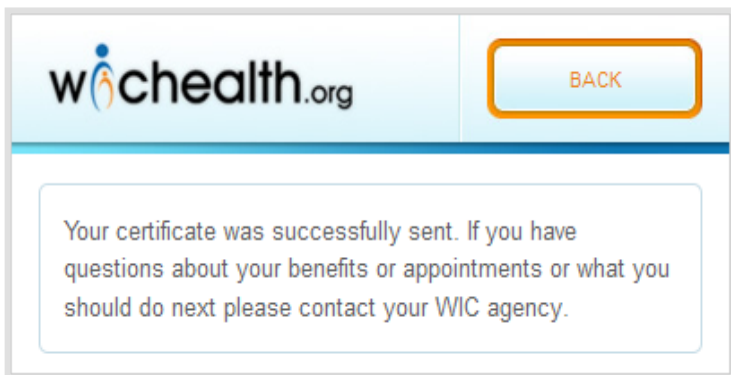

... because emailing the certificate should be easy!

How does it work?

Your agency's email address is added to our system, that way, at the end of a lesson when the client clicks "Email Certificate" the certificate is sent automatically to that email address.

1. Client clicks on this button on the certificate page.

2. Based on what agency is selected in the client's profile, the certificate will be automatically sent to the email address on file. The client will receive a message stating their certificate was sent successfully. **It's as simple as a click!**

Why should my agency add this feature?

By adding this feature your staff and clients will no longer experience these issues:

- Sending the certificate to the wrong email address.
- Typing the email address incorrectly.
- Client's not receiving benefits due to the agency not receiving the certificate.
- Client's calling the agency for the email address.

Over **100 agencies** are already using this feature and it is working great!
